Our family is attached to its land, to this Corsica which is home to a concentration of plants whose magnificence is equalled only by their effectiveness. It was our mission to offer the best of nature for this new sanctuary of beauty and well-being.

Pioneers in plant science for three generations, Clarins researchers have traveled the globe in search of the most effective plant extracts using processes that preserve ecosystems and respect local populations. They give priority to organic ingredients. Clarins develops exceptionally effective formulas with the utmost care.

This is how the Spa Marinca by Clarins was born, designed as a Garden of Eden to recharge your batteries and experience a moment of serenity.
